Jamco offers a complete line of stainless steel cabinets, utility carts, workbenches, work stands and more. Stainless steel is easy to clean and resists rust and corrosion, perfect for medical or food service operations.

Hazardous Drugs Handling in Healthcare Settings

USP GC <800> Effective December 1, 2019

Compounding pharmacies, hospitals and other medical/pharmaceutical facilities have until December 1, 2019 to comply with the impending USP General Chapter <800> rules. Akro-Mils and Jamco products can help them with hazardous drug transport throughout their supply chain, from the drug’s arrival, to its final storage location.
<table>
<thead>
<tr>
<th>USP General Chapter &lt;800&gt;</th>
<th>Description of the Problem</th>
<th>Product Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gowns, head, hair, shoe covers, and two pairs of chemotherapy gloves are required for compounding sterile and nonsterile hazardous drugs. Two pairs of chemotherapy gloves are required for administering antineoplastic hazardous drugs. Gowns shown to resist permeability by hazardous drugs are required when administering injectable antineoplastic hazardous drugs.</td>
<td>There must be places to store and display PPE (personal protective equipment) such as gloves, gowns, eye and face protection or head, hair and shoe covers along with wipes or Closed System Drug-Transfer Devices (CSTD) so they are easily accessible to the staff.</td>
<td>TiltView® Tilting Bins</td>
</tr>
<tr>
<td>Hazardous drugs must be transported in containers that minimize the risk of breakage or leakage.</td>
<td>In order to protect the staff, hazardous drugs must be secure from spilling or breaking as they are transported throughout the facility.</td>
<td>Super-Size AkroBins on Wire Shelving</td>
</tr>
<tr>
<td>Packaging containers and materials must be selected to maintain physical integrity, stability, and sterility (if needed) of the hazardous drugs during transport. Packaging materials must protect the hazardous drug from damage, leakage, contamination, and degradation, while protecting healthcare workers who transport hazardous drugs.</td>
<td>Containers used in packaging hazardous drugs must secure and protect them from the surrounding environment.</td>
<td>Akro-Tubs on Mobile Wire Shelving</td>
</tr>
<tr>
<td>Disposable or clean equipment for compounding (such as mortars and pestles, and spatulas) must be dedicated for use with hazardous drugs. This refers to equipment (or parts of equipment) that comes in direct contact with hazardous drugs.</td>
<td>There must be a separate set of equipment for compounding hazardous drugs and non-hazardous drugs, ex: mortars, pestles, spatulas, etc. Color coding storage areas with AkroBins will make it easy to differentiate between the two.</td>
<td>Stak-N-Store on Wire Shelving</td>
</tr>
</tbody>
</table>

**Products for the safe storage of hazardous materials:**

Hazardous materials must be stored to prevent spillage or breakage if the container fails. All Jamco Safety Cabinets have a 2” leak proof sill to contain spills or leaks.

- Under Counter Cabinets for Flammable Liquid Storage
- Safety Cabinets for Corrosive Liquid Storage
- Safety Cabinets for 55-Gallon Drum Storage
- Safety Cabinets for Hazardous Material Storage
Jamco offers a complete line of stainless steel cabinets, utility carts, workbenches, work stands and more. Stainless steel is easy to clean and resists rust and corrosion, perfect for medical or food service operations.
