

# Myers is Material Handling

At Myers Industries, we redefine excellence through our esteemed brand portfolio. Our innovative solutions empower industries worldwide, providing unparalleled efficiency, durability, and reliability. From Akro-Mils' cutting-edge storage systems to Jamco Products' robust material handling solutions and advanced safety cabinets, and Buckhorn's dependable reusable packaging, our products optimize operations, streamline logistics, and enhance workplace safety. We are committed to driving success through superior quality and continuous innovation, ensuring our customers achieve peak performance and cost savings across every application.

Buckhorn, Inc. provides customers with material handling solutions, manufacturing an extensive selection of reusable storage products, including intermediate bulk containers, handheld containers, and pallets. Buckhorn's products are specifically designed to protect, improve workflow, lower operating costs, and increase profitability.

Akro-Mils is a leading manufacturer of storage, organization, and transport products designed to improve productivity and inventory control in nearly every setting. With configurations ranging from plastic storage bins and wire shelving systems to industrial carts and plastic totes and containers, Akro-Mils leads the industry in material handling productivity solutions.

Jamco is a top designer and manufacturer of heavy-duty, steel material handling carts, storage containers, and safety cabinets used across many markets. Jamco's strong product offering, relationships with industrial distributors, and reputation for quality and service create a strong growth platform for storage and safety products.
